PURPOSE: To obtain the titled cosmetic effective for lengthening and thickening the eyelashes and having improved characteristics such as feeling to the skin, etc., by adding a specific amount of a specific liquid polymer to an eyelash cosmetic containing a synthetic resin emulsion and/or wax and fibers. **CONSTITUTION:** The titled cosmetic is prepared by adding a polymer which is liquid at normal temperature and has an average molecular weight of ≥ 500 , preferably ≥ 600 , especially a liquid polybutene, to an eyelash cosmetic containing a synthetic resin emulsion and/or wax and fibers. The amount of the liquid polymer is 0.5-20wt%, preferably 1-15wt%. The cosmetic thus obtained has excellent effect for lengthening and thickening the eyelashes and has various characteristics required as the eyelash cosmetic, e.g. applicability, state of finished eyelashes, removability, water-resistance, oil-resistance, useful life, etc. The synthetic resin emulsion, wax and fiber may be known ones used in conventional eyelash cosmetics.
